Final Results for the 12 months ended 31 July 2011

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, announces its Preliminary Results for the year ended 31 July 2011.

Financial highlights

- Revenue for the year increased by 63% to £5,326,866 (2010: £3,254,758)
- Profit before tax up £898,199 to £669,702 (2010: loss £228,497)
- Net cash after outstanding debt rose by £784,170 to £654,851
- Dividends to be resumed with proposed final dividend for the year of 0.2p (2010: no dividend)

Operational highlights

- New Chairman and new Director of International Sales appointed
- Interest in data, services and studies continued to be strong
- Major new proprietary contract (\$1.1m gross revenue) signed and completed in the year
- New Iraq data marketing agreement with significant sales in the year
- First sale of new Russian aeromagnetic datasets
- Equatorial Atlantic study continues to sell well and ongoing investment in the Global Programmes

Commenting on outlook, Stuart Paton, Non-Executive Chairman of GETECH Group plc, said:

"With the increased strength of our balance sheet by July 2011, the increased extent of our data library and the ongoing integrated study work, I believe that we have now built a strong foundation for the coming years. We have already reported two significant data sales after July this year and anticipate that there will be further positive developments during the year".

Chairman's statement

I am pleased to make my first report as Chairman of the Company, on the sixth full year results since its admission to AIM, of GETECH Group plc and its subsidiary company ("GETECH" or "the Group"), for the year ended 31 July 2011. GETECH is a geoscience services business specialising in the provision of data studies and services to the oil, gas and mining exploration sectors.

Results

I report a Group profit before tax of £669,702 (2010: loss £228,497) after interest receivable of £5,356 (2010: £10,927) on revenue of £5,326,866 (2010: £3,254,758). The post-tax profit was £574,987 (2010: loss £258,362) giving earnings per share of 1.97p (2010: loss 0.88p).

Dividends

GETECH intends to reinstate its policy of progressive dividends as appropriate and is proposing a dividend of 0.2p per share in respect of the year to 31 July 2011. The dividend will be paid on 22 December 2011 to shareholders on the register on 25 November 2011.

Business review

I am pleased to report a turnaround in the performance of the Company, generating a record level of revenue, and profit of £669,702 which was ahead of our expectations for the full year. Revenue increased by 63% year on year, marking a significant improvement in the demand for our products and services and the market in general.

We announced a number of major successes during the year, of which the rights to market the Iraqi gravity and magnetic data, and the \$1.1m proprietary contract, were the most significant. Each of these made a significant contribution in the year.

The oil price has remained at strong levels in the region of \$100 per barrel, although the gas price, which affects our US business, has remained lower than the level we believe is necessary to stimulate the US domestic business.

As previously reported, in anticipation of continuing risks and uncertainty in the market at that time, we completed a £1m debt facility with the National Westminster Bank plc in September 2009. This debt facility was important in ensuring stability in the difficult conditions at that time. The interest rate on the facility is 1.6% above the London Interbank Offered Rate (LIBOR) which has kept the overall cost of the facility low. With improved market conditions, we are pleased to note that, as at 31 July 2011, we had a gross cash position of £1,345,000, debt of only £690,000 and hence a net cash position of £655,000.

Outlook

The historically high oil and gas prices (outside the US) have resulted in what we perceive to be a continued recovery, particularly for exploration and production companies. We also believe this is likely to lead to increased spending from companies in exploration and hence on the services we offer.

We have made a solid start to 2011/12. As reported on 12 August 2011, we completed the second delivery of the full Iraq aeromagnetic dataset with gross revenue in excess of \$500,000. We are also very pleased that the major proprietary project we announced in September 2010 was completed and delivered within the period and are optimistic that this will lead to further substantial projects.

We anticipate that in the first half of the year 2011/12 there will be a continuation of the strong trend in gravity and magnetic data sales and we will begin to see the benefits from the major investment in our geological initiatives. We are already receiving encouraging signs of interest in our multi-year Global Programmes.

We believe that the combination of our increasing library of products and data, and the significantly strengthened sales team, will reinforce the growth path and we are optimistic about the coming years.

Finally, I would like to say how pleased I am to have been appointed by the Company and to thank the staff and my fellow Directors for all their hard work.

Dr Stuart Paton

Non-executive Chairman

Operating review

I report that in our sixth year as a public quoted company, GETECH Group plc ("GETECH" or "the Group") returned a pre-tax profit of £669,702 (2010: loss £228,497) for the year ended 31 July 2011.

Business setting

As anticipated, the global markets continued to recover and the present year was effectively business as usual.

The oil price has now been at historically strong levels for more than two years. We believe that the level and relative stability of the oil price will continue to provide a sound market environment for exploration.

Company history

GETECH has its origins as a research group at the University of Leeds, Department of Earth Sciences (now part of the School of Earth and Environment). It started in 1986 by initiating the compilation of gravity data for the continent of Africa supported by a group of international oil and mining company sponsors.

In 1996, GETECH opened an office in Houston, Texas. In 2000, GETECH spun out from the University of Leeds as a private company (Geophysical Exploration Technology Limited) and subsequent business success and the formation of the Petroleum Systems Evaluation Group in 2004 resulted in the flotation of the Company on AIM in September 2005, with a name change to GETECH Group plc. GETECH was the first spin out Company from the University of Leeds to float on AIM.

Business activities

The Directors were very pleased that Dr Stuart Paton, formerly Chief Executive Officer of Dana Petroleum plc, agreed to join us as Chairman in April 2011 and believe he has already made an impact in the Company. Also, in May 2011, Professor Paul Carey joined us as Director of International Sales.

In recent years GETECH has developed a major strength in the provision of integrated exploration solutions to clients. This has been achieved through a focus on the technical quality of our geophysical and geological work, and a commitment to the development of new and improved techniques and methodologies. We have been able to develop and incorporate in our work new proprietary geophysical interpretation methods and integrate these into studies which provide insights into key exploration issues.

Oil and gas (and to a lesser extent) mining companies license our data and studies when they are evaluating new exploration areas and/or when they wish to expand their current exploration activities into neighbouring regions. One of our great strengths in generating these integrated solutions is the ability to bring together staff across a broad range of disciplines including, amongst others, potential field geophysics, structural geology, plate tectonics, palaeodrainage and palaeogeography analysis and geochemistry.

While the general market for our products and services was severely depressed throughout the calendar year 2009, it started to recover in early 2010. I am particularly pleased to note that sales from our global database of gravity and magnetic data have remained strong and that we were able to announce the completion of an exclusive marketing agreement covering Iraq gravity and magnetic data in December 2010. Iraq reportedly has the third largest oil reserves in the world and the dataset has potentially major value, particularly in anticipation of the current Iraq licensing round.

In September 2010 we announced the signing of a major new proprietary integrated interpretation contract with gross revenue of \$1.1m. This involved a wide range of our technical disciplines and was completed and delivered within the year.

We have continued to invest in and develop our Global Programmes initiative and believe that we will have our first clients for this multi-year project in the near future. We believe that our clients recognise the potential value of these programmes for their new ventures and exploration work. In addition, the programmes will provide operational benefits to GETECH: increased flexibility in meeting client specific needs; a platform which improves the efficiency of production and time to completion for future products; and increased responsiveness to emerging market opportunities.

After the year end we concluded an agreement which significantly reduces the revenue shares that we pay on some datasets. Since we had previously accrued the costs in our accounts, we were able to write back a substantial accrual. This affected the year under review and, while the amounts are uncertain, it also affects future years as it will reduce the cost of sales on an ongoing basis.

The future

GETECH has invested heavily over the last few years in a number of areas. We believe the time and effort spent in establishing international relationships has begun to pay off. The long-standing relationship in Russia has developed further, and newly confirmed relationships have led to the Iraqi data marketing agreement as well as a \$1.1m integrated interpretation project. In the latter case we understand that the client is very satisfied with our work and are very optimistic that there will be follow-on projects. Further such international discussions are also underway. We are now actively marketing the Global Programmes and believe that the interest we have already generated will soon lead to specific commitments.

We have recognised for some while that we needed to make a step change in our sales capability, as a consequence of our enhanced business activities. In particular, the range of geological based studies needs proactive selling by technically competent staff. The role is very specialised and Professor Paul Carey, who has a strong technical background as well as extensive sales and business experience, has taken on this role.

Finally I would like to thank all our staff and Board colleagues for their unstinting efforts on behalf of GETECH. We believe we have made it a Company that people want to work for and our team looks forward to the new challenges that the future years will bring.

Raymond Wolfson

Chief Executive Officer

The financial information set out in the announcement does not constitute the group's statutory accounts for the years ended 31 July 2011 or 31 July 2010. The financial information for the year ended 31 July 2010 is derived from the statutory accounts for that year which have been delivered to the Registrar of Companies. The auditor reported on those accounts; their report was unqualified and did not include any statement under s498(2) or s498(3) of the Companies Act 2006. The consolidated statement of comprehensive income, the consolidated statement of financial position, the consolidated statement of cash flows, the consolidated statement of changes in equity and the notes to the consolidated financial statements for the year then ended have been extracted from the Group's 2011 statutory financial statements upon which the auditor's opinion is unqualified and does not include any statement under s498(2) or s498(3) of the Companies Act 2006. The announcement has been agreed with the company's auditor for release. In accordance with Rule 20 of the AIM Rules, GETECH Group plc confirms that the annual report and accounts for the year ended 31 July 2011 will be posted to shareholders and will be available to view on the Company's website at www.getech.com on 11 November 2011.

The accompanying notes form an integral part of these financial statements.

Notes to the consolidated financial statements for the year ended 31 July 2011

Nature of operations

The principal activity of GETECH Group plc and its subsidiary company Geophysical Exploration Technology Inc. (collectively "GETECH" or "the Group") is the provision of gravity and magnetic data, services and geological studies to the petroleum and mining industries to assist in their exploration activities.

General information

GETECH Group plc is the Group's ultimate Parent Company ("the Parent Company"). It is incorporated in England and Wales and domiciled in England (CRN: 2891368). The address of its registered office is Convention House, St. Mary's Street, Leeds LS9 7DP. Its principal place of business is Kitson House, Elmete Hall, Elmete Lane, Leeds LS8 2LJ. GETECH Group plc shares are admitted to trading on the London Stock Exchange's AIM.

Basis of preparation

These consolidated financial statements ("the financial statements") have been prepared in accordance with International Financial Reporting Standards (IFRS) in issue as adopted by the European Union. IFRS include Interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC).

The financial statements have been prepared under the historical cost convention except in relation to financial instruments held at fair value through profit or loss.

The accounting policies set out below have been applied consistently throughout the Group for the purpose of preparation of the financial statements.

The Directors have instituted regular reviews of trading and cash flow forecasts and have considered the sensitivity of these forecasts to different assumptions about future income and costs. With the

recovery in the market, the continued investment in new products and services, and the improved cash levels, the Directors are fully satisfied that the Group is a going concern and will be able to continue trading for the foreseeable future.

Dividends

GETECH intends to reinstate its policy of progressive dividends as appropriate, and is proposing a final dividend of 0.2p per share in respect of the year to 31 July 2011. The dividend will be paid on 22 December 2011 to shareholders on the register on 25 November 2011.

	2011	2010
	£	£
Proposed after the year end (not recognised as a liability)		
Final dividend in respect of the year ended 31 July 2011 at 0.2p per share (2010: no dividend)	58,474	-

Earnings/(loss) per share

Basic earnings/(loss) per share is calculated by dividing the profit/(loss) attributable to equity holders of the Group by the weighted average number of the Ordinary Shares in issue in the year.

	2011	2010
Profit/(loss) attributable to equity holders of the Group	£574,987	(£258,362)
Weighted average number of Ordinary Shares in issue	29,237,151	29,237,151
Basic earnings/(loss) per share	1.97p	(0.88)p
Diluted earnings/(loss) per share	1.84p	(0.86)p

Diluted earnings/(loss) per share is calculated by dividing the profit/(loss) attributable to equity holders of the Group by the weighted average number of the Ordinary Shares which would be in issue if all the options granted, other than those which are anti-dilutive, were exercised. The addition to the weighted average number of the Ordinary Shares used in the calculation of diluted earnings per share for the year ended 31 July 2011 is 2,088,414 (2010: nil).

Of the options in issue at 31 July 2011, 529,789 were anti-dilutive because the conditions for exercise have not been met. The majority of options granted at 31 July 2010 were anti-dilutive.

Annual General Meeting

The Annual General Meeting of GETECH Group plc will be held at 12 noon on 14 December 2011 at Kitson House, Elmete Lane, Leeds LS8 2LJ.

18-07-11

IRAQ DATA SALES FOLLOWING SIGNING OF EXCLUSIVE MARKETING AGREEMENTS

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, is pleased to announce an update on sales of the Iraq gravity and aeromagnetic data. This follows the signing of an exclusive marketing agreement in Erbil with the Geological Survey of Iraq, announced on 20 December 2010.

The full reprocessed and integrated data sets have been available for general sale to the oil industry since the end of June 2011, and a major order in excess of \$500,000 has now been received. This order, together with early smaller sales, has brought the gross revenue from Iraq data sales since December 2010, to more than \$750,000.

Iraq is reported to have the fourth largest oil reserves in the world, and is an area of substantial exploration interest. The ground based gravity data (116,565 stations) and the aeromagnetic data (184,000 flight line km) will enable oil companies, for the first time, to have access to these important exploration datasets which will significantly help their regional and detailed evaluation of sedimentary basin geometries, depths to basement and structure, to a degree not previously possible.

Professor Derek Fairhead, President and Founder of GETECH, who has been at the forefront of negotiations with Iraq commented "The agreements that were signed in December 2010 took GETECH more than 5 years to complete. We believe the immediate interest in these data and subsequent confirmed sales reflect the strong international interest both in oil exploration in Iraq and in the data we are able to provide. Thus we have grounds to believe that there will be substantial revenue generated from these data in the coming months."

RUSSIAN SUCCESS: FIRST SALE OF AEROMAGNETIC PRODUCTS IN 2011 SECURED

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, is pleased to announce the first sale in 2011 of Russian aeromagnetic products.

GETECH is permitted to exclusively market these Russian aeromagnetic and associated interpretation products.

With the oil price relatively stable in the region of \$100 per barrel, several major oil companies are now making enquiries about Russian products. The first of these, from a major North American oil company, resulted in a purchase priced at US\$330,000 (a proportion of which is remitted to the supplier of the products).

Professor Derek Fairhead, President and Founder of GETECH commented "I believe this first sale in 2011 reflects the increased international interest in exploration activity in this relatively stable part of the world. This agreement, together with the exclusive marketing agreement for Iraq data (announced on 20 December 2010), reinforces GETECH's position as one of the leading providers of exploration data to the world's oil industry."

Issue of Options

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, announces that it has agreed to issue new options to Stuart Paton, who was appointed as a Director and Chairman of the Company on 26th April 2011.

The Options

The Company granted Stuart Paton 900,000 unapproved share options at 17.5p per share on 27th April 2011.

These options become exercisable over a period of three years:

- 300,000 are exercisable with effect from the date of grant
- 200,000 become exercisable after the first anniversary of grant
- 200,000 become exercisable after the second anniversary of grant
- 200,000 become exercisable after the third anniversary of grant

All the options are only exercisable for so long as he remains a Director of the company and in any event cannot be exercised later than the tenth anniversary of grant.

Stuart Paton has no shares or share options in the Company other than those listed above.

Directors' shareholding

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, announces that on 27 April 2011 Peter Stephens, a director and former Non-executive Chairman, acquired a total of 5,000 ordinary shares of 0.25p each in the Company ("Ordinary Shares"), at a price of 19.25p each.

Following this acquisition, Peter Stephens holds 1,553,000 Ordinary Shares, representing approximately 5.31 per cent. of the current issued share capital of the Company.

Board Changes

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, confirms the appointment of Stuart McNicol Paton as non-executive director and Chairman of the Company with immediate effect.

Peter Stephens is to step back as Non-Executive Chairman of GETECH, but will remain as a non-executive director of the Company.

Raymond Wolfson, GETECH's Chief Executive commented "We are delighted that Stuart has agreed to join GETECH and are excited about working with him. His background and experience strongly complement our existing strengths, particularly given his recent experience as Chief Executive of Dana Petroleum plc, and we believe he will add value to the Company in a number of significant ways. We are also particularly pleased that Peter Stephens has agreed to remain as a non-executive director. His support and guidance have been invaluable and we look forward to continuing to work with him."

Disclosures under the AIM Rules

Stuart McNicol Paton, aged 43, was previously a director of the following companies:

- Dana Petroleum Public Limited Company;
- Dana Petroleum (E&P) Limited;
- Dana Petroleum (North Sea) Limited;
- Dana Petroleum (Russia) Limited;
- Croft (UK) Limited;
- Croft Exploration Limited;
- Croft Offshore Oil Limited
- Croft Oil and Gas plc;
- Dana Petroleum (BVUK) Limited;
- Dana Petroleum (Holdings) BV;
- Dana Petroleum Netherlands BV;
- Dana Petroleum (Manzala) Limited;
- Dana Petroleum (Norway) AS;
- Dana East Zeit Limited;
- Dana North Zeit Limited;
- Dana South October Limited;
- Dana South July Limited;
- Dana Ras Abu Darag Limited;
- Dana East Beni Suef Limited;
- Dana West Abu Gharadig Limited;
- Dana Qarun Limited;
- Dana Petroleum (Cyprus) Limited; and
- Evikhon Limited

Stuart is not, and has not been in the past five years, a director or partner of any other company or partnership.

Stuart does not hold any shares in the Company but will be granted options in the Company in the immediate future.

There is no further information required to be disclosed in accordance with Schedule 2, paragraph (g) of the AIM Rules for Companies.

Senior Management Appointment

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, is pleased to announce the recruitment of a Director of International Sales. Professor Paul Carey, who has been acting as a consultant with the Company on a part-time basis since October 2010, will be taking up a full time role from 1 May 2011.

Professor Carey brings what the directors believe is a unique blend of professional sales skills and an exceptionally strong technical background. He is currently Professor of Petroleum Geology at the University of the Western Cape, Capetown, where he had dual academic and business roles. In the latter role he was responsible for the "Highly Immersive Visualisation Unit", which was formally opened in March by Bishop Desmond Tutu. Immediately prior to this he was employed by a major consultancy operating in similar fields to GETECH, with direct sales and business development responsibilities at senior levels.

Raymond Wolfson, GETECH's Chief Executive commented "We are delighted that Paul will be joining us on a full time basis from the start of May. He has already made a significant impact through his experience, technical understanding and personal presence in the industry and he will be a very important addition to our team."

Interim report for the six months ended 31 January 2011

GETECH, a leading geosciences business specialising in the provision of data, studies and interpretation services to the oil, gas and mining exploration sectors, announces its interim results for the six months ended 31 January 2011, which mark a return to profitability.

Financial Highlights

- Revenue more than doubled to £2.65m (H1 2010: £1.17m)
- Return to profitability with profit before tax of £294,000 (H1 2010: loss £392,000)
- EPS of 0.74p (H1 2010: loss of 1.13p)
- No interim dividend proposed (2010: no dividend)
- Cash levels recovering with gross cash of £1.03m and a very strong sales ledger at 31 January 2011

Operational Highlights

- Oil markets more settled with strong oil price and exploration budgets increasingly available
- Major new data marketing licence signed with Iraq
- Equatorial Atlantic study completed and selling very well
- Good progress on the major proprietary contract announced in September 2010

Commenting on outlook, Peter Stephens, Non-Executive Chairman of GETECH Group plc, said:

"GETECH's result for the full year to July 2011 is, as usual, dependent on the crystallisation of a number of deals and the pattern of demand in the remaining few months of the year. However, we have already seen that the market has demonstrably recovered and the Directors believe that this will be reflected in the continuing recovery of our business.

"We remain confident about our medium and long-term prospects."

ABOUT GETECH

Founded in 1986, GETECH Group plc is a leading geosciences service company providing gravity and magnetic data and a growing suite of petroleum exploration studies to the oil and

mining exploration industries.

By making use of GETECH's services, data and studies early in their programmes, exploration companies can be more cost effective and focused in their decision making.

CHAIRMAN'S STATEMENT

I report the interim accounts of GETECH Group plc and its subsidiary company (collectively "GETECH"), the geoscience business specialising in the provision of data, studies and services to the petroleum and mining exploration sectors, for the six months ended 31 January 2011.

Results

GETECH is pleased to report a Group profit before tax of £294,000 (six months ended 31 January 2010: loss £392,000) after interest receivable of £3,000 (six months ended 31 January 2010: £3,000) on revenue of £2,653,000 (six months ended 31 January 2010: £1,174,000). The post-tax profit was £216,000 (six months ended 31 January 2010: loss £330,000).

The accounts have been prepared under IFRS.

Dividend

Your Board does not recommend an interim dividend.

Business review

During the half year under review, we continued to see improvements in the market. The strong oil price and clear indications that exploration budgets are increasingly available to us have resulted in a very strong revenue performance in this half year. It is notable that the only previous half year in which we exceeded this level of revenue was when we made a major sale of a single dataset, at close to £1m.

We have been particularly pleased by the continuing strength of demand for our gravity and magnetic data. We also completed the Phase II of our "Geodynamics and Petroleum Geology of the Equatorial Atlantic" study and this has been selling extremely well.

The work on the major proprietary contract we referred to in the announcement in September 2010 commenced in the autumn of 2010 and we are very pleased with the progress. After a very long gestation period, in December 2010 we were very pleased to announce the completion of an exclusive data marketing agreement with Iraq. The first modest sales from this dataset were made within days of the contracts being completed and we remain optimistic about future sales in this region, which includes very major oil reserves.

We have continued to repay the principal amounts on the loan that we negotiated in 2009 and cash has begun to recover. At 31 January the gross cash stood at £1,026,000 and the sales ledger stood at £1,374,000.

Outlook

Looking forward to the second half of this financial year, we plan to complete the large proprietary contract referred to earlier. We also plan that the major parts of the Iraq dataset

will be ready for sale later in the period, as will our new European Mediterranean Magnetic project.

The oil price has continued to be strong, typically above \$90 per barrel, which is encouraging for exploration in general and for our part of the market in particular.

GETECH's result for the full year to July 2011 is, as usual, dependent on the crystallisation of a number of deals and the pattern of demand in the remaining few months of the year. However, we have already seen that the market has demonstrably recovered and the Directors believe that this will be reflected in the continuing recovery of our business.

We remain confident about our medium and long term prospects.

PETER STEPHENS

Non-Executive Chairman

Notes to the interim report

For the six months ended 31 January 2011

1 Nature of operations

The principal activity of GETECH Group plc ("the Company") and its subsidiary company Geophysical Exploration Technology Inc. (collectively "GETECH" or "the Group") is the provision of gravity and magnetic data, services and geological studies to the petroleum and mining industries to assist in their exploration activities.

2 General information

GETECH Group plc, a limited liability company, is the Group's ultimate Parent Company. It is incorporated in England and Wales and domiciled in England (CRN: 2891368). The address of its registered office is Convention House, St Mary's Street, Leeds LS9 7DP. Its principal place of business is Kitson House, Elmete Hall, Elmete Lane, Leeds LS8 2LJ. GETECH's shares are admitted to trading on the London Stock Exchange's AIM.

The financial information for the six months ended 31 January 2011 and 31 January 2010 has not been audited and does not constitute full financial statements within the meaning of Section 434 of the Companies Act 2006. These consolidated interim financial statements ("the interim financial statements") have been approved by the Board.

The financial information relating to the year ended 31 July 2010 does not constitute full financial statements within the meaning of Section 434 of the Companies Act 2006. This information is based on the Group's statutory accounts for that period. The statutory accounts were prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS) and received an unqualified audit report and did not contain statements under Sections 498(2) or (3) of the Companies Act 2006. Those financial statements have been filed with the Registrar of Companies.

3 Basis of preparation

The interim financial statements are for the six months ended 31 January 2011. They have been prepared using the recognition and measurement principles of IFRS. IFRS include interpretations issued by the International Financial Reporting Interpretation Committee (IFRIC). They do not include all the information required for full annual financial statements and should be read in conjunction with the financial statements of the Group for the year ended 31 July 2010.

The interim financial statements have been prepared under the historical cost convention except in relation to financial instruments held at face value through profit or loss.

The interim financial statements have been prepared in accordance with the accounting policies adopted in the last annual financial statements for the year ended 31 July 2010.

The accounting policies have been applied consistently throughout the Group for the purpose of preparation of the interim financial statements.

In the year ended 31 July 2010 there was a prior year restatement of cost of sales. This resulted in a restatement in the Consolidated statement of comprehensive income. There was no impact on the reported results and the only effect was to transfer costs from "Administrative costs" to "Cost of sales". The figures for the six months ended 31 January 2010 are restated in the Consolidated statement of comprehensive income.

4 Dividends

No dividends were paid during the period (six months ended 31 January 2010: £nil; year ended 31 July 2010: £nil).

5 Share options

During the period the Company issued share options to certain staff members and Directors of GETECH in place of existing options held by them in order to: (i) adjust the exercise price of existing options to bring them more into line with the current market price; and (ii) reduce the number of options held as a consequence.

In addition the Company has taken the opportunity to issue new options to one Director in recognition of his significant and ongoing contribution to the Company.

6 Earnings per share

Basic earnings per share is calculated on the basis of the profit for the period after tax, divided by the weighted average number of ordinary shares in issue in the period of 29,237,151 (six months ended 31 January 2010: 29,237,151; year ended 31 July 2010: 29,237,151).

Diluted earnings per share is calculated on the basis of the profit for the year after tax, divided by the weighted average number of ordinary shares in issue plus the weighted average number of ordinary shares which would be issued if all options granted were exercised. The addition to the weighted average number of ordinary shares used in the calculation of diluted earnings per share for the six months ended 31 January 2011 is 399,725 (six months ended 31 January 2010: 1,256,573; year ended 31 July 2010: 519,146). A minority of options in issue at 31 January 2011 were anti-dilutive (31 January 2010: all options; 31 July 2010: a majority of options).

7 Interim Report

A copy of the interim report will be dispatched to shareholders on or around 12 April 2011 and will be available from that date on the Company's website (www.getech.com).

28-03-11

South American Data Update

GETECH, the oil services business specialising in the provision of exploration data and petroleum systems studies and evaluations, is pleased to announce a significant increase in levels of interest in our range of data, interpretation services and study products for South America.

Since 1 February 2011, GETECH has received orders for South American data, services and studies with sales value in excess of \$550,000. This arises from a number of factors:

-- GETECH has extensive coverage of gravity data and a history of working in South America dating back to 1988. The Company has been involved in managing gravity data acquisition in Argentina, Brazil, Chile and Paraguay since 1991 in collaboration with Brazilian partners. This, together with our ability to undertake integrated proprietary contracts has led to a significant interpretation contract.

-- In 2010 the study "The Geodynamics and Petroleum Geology of the Equatorial Atlantic Margins" was completed and this has sold well.

-- We have significantly strengthened our sales team with the addition of a highly experienced and qualified salesman. One of his first sales target areas was South America which helped the Company to achieve the sales figure quoted above.

Ian Somerton, GETECH's marketing director comments "The increased sales in South America appear to reflect a combination of, timely studies being available, increased exploration activities due to the high oil prices and the uncertain political situation that exists in North Africa. We believe that when the next Brazilian licensing round is announced, which is expected to be later this year, the interest in our products and services will increase."

Trading Statement - Half Year to 31 January 2011

GETECH, a leading geosciences business specialising in the provision of data, studies and interpretation services to the oil, gas and mining exploration sectors, announces a trading update for the six months ended 31 January 2011.

The Company is pleased to announce that trading has been in line with expectations, and continues the recovery seen in the previous two half-years.

In particular, we are pleased to report that the first sales arising from the Iraqi data marketing agreement (announced in December) were made within days of signature of the agreement and global data sales in general have continued to strengthen.

Interest in our studies continues and notably the second phase of our Equatorial Atlantic study, which covers both the West African and South American sides of the Atlantic, has proved to be very attractive and has sold well.

Commenting on the trading, Raymond Wolfson, Chief Executive Officer of GETECH Group plc, said:

"We are very pleased with the continuing trend in data sales. With this and our increasing library of studies available for sale, I believe that the trends in our recovery will continue. Further, the strength of the oil price is encouraging and likely to underpin the demand for exploration data, studies and services with existing and new clients. First half revenue was back to pre-downturn levels generating a satisfactory pre-tax profit."

05-01-11

Notification of Change of Interest

The Company announces today that it has received the following notifications of change in interest in the Company's share capital:

On 30 December 2010, IP Group plc indirectly acquired 500,000 Ordinary Shares in the Company as a result of IP Group plc's subsidiary IP2IPO Limited directly acquiring 500,000 Ordinary Shares in the Company. The total number of ordinary shares now indirectly held by IP Group plc is 6,763,943 which represents, in total, 23.13% of the issued share capital of the Company and 23.13% of the total voting rights of the Company. The total numbers of shares now directly held by subsidiaries of IP Group plc are as follows: Techtran Group Limited holds 3,250,426 representing 11.12% of the issued share capital and 11.12% of the total voting rights of the Company; IP2IPO Limited holds 3,176,978 representing 10.87% of the issued share capital and 10.87% of the total voting rights of the Company; and IP Venture Fund (a limited partnership fund that is managed by Top Technology Ventures Limited) holds 336,539 representing 1.15% of the issued shares capital and 1.15% of the total voting rights of the Company.

Also on 30 December 2010, Invesco Limited, through its nominee the Bank of New York, disposed of 1,471,920 Ordinary Shares in the Company. The total number of ordinary shares now held indirectly by Invesco Limited, through its nominee, is 1,304,846 representing 4.46% of the issued share capital of the Company and 4.46% of the total voting rights of the Company.
