

# GIS Services

## Business Intelligence and Spatial Analysis for Enhanced Decision Making

Put your data on the map with our expert support - helping you implement ArcGIS, the market leading Geographic Information System platform by Esri.

Deploy location-based data visualizations, analyses and dashboards across Energy Resources, Petroleum, Pipeline, CCS, Renewables, Hydrogen, Geothermal and HSE projects.

### Integrate and visualise key information:

- Combine key data layers using into a single visualization environment.
- Reveal previously unseen trends, relationships and patterns.

### Spatially analyse assets, patterns, trends and opportunities:

- Enrich information with demographics / business data.
- Analyse key locations and relationships.
- Perform complex multi-criteria site suitability modelling and ranking.

### Share results with decision makers:

- Create interactive map-enabled dashboards and apps.
- Use scenario planning tools for assessing sensitivities.
- Deploy Dashboards, Web & Mobile Apps, Story Maps, Presentations & Reports.

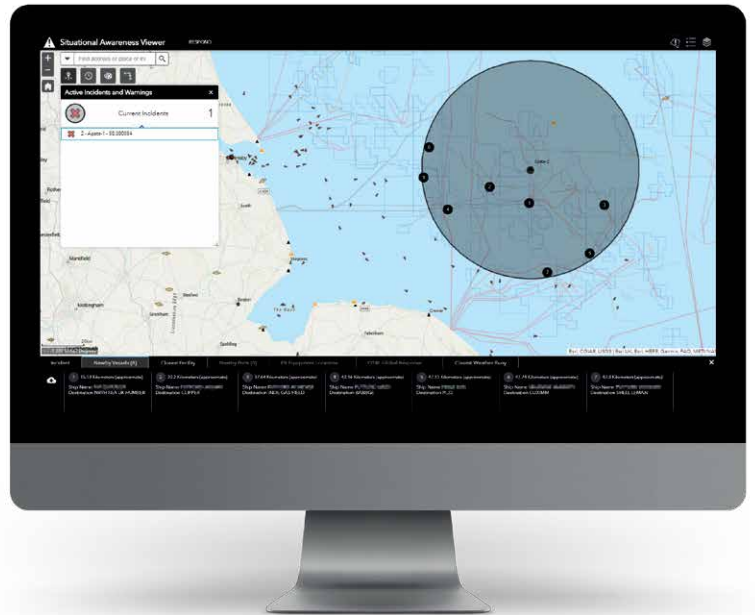

## MANAGED GIS SERVICES

We provide end-to-end services for the ArcGIS technology stack - including strategy, design, migration, implementation, maintenance, support and training:

- Reduce overhead in maintaining in-house GIS personnel or systems.
- Integrate your key enterprise systems with ArcGIS.
- Deploy scalable solutions that suit your business needs.

Our services deliver domain-specific workflows across Energy Resource sectors. Typical services projects include:

- ArcGIS system implementation – ArcGIS Desktop, ArcGIS Online & ArcGIS Enterprise.
- ArcGIS system maintenance - ongoing system maintenance & user support.
- System & data migration – version upgrades and cloud migrations.

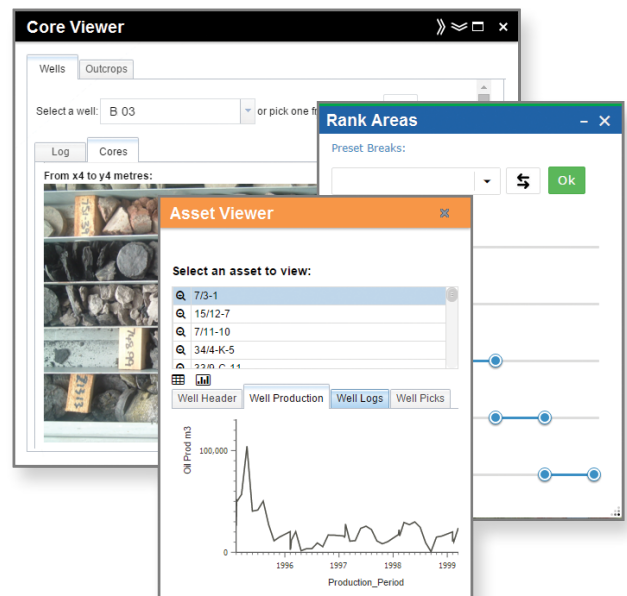

## GIS DEVELOPMENT SERVICES

Enhance your energy resource ArcGIS Platform implementation with bespoke tools to meet your specific business requirements.

We have decades of experience with ArcGIS API for JavaScript, ArcGIS Runtime, Web AppBuilder, Python, ArcPy, ArcObjects SDK for .NET and the ArcGIS Pro SDK for .NET.

- Deploy customisable out-of-the-box ArcGIS Platform templates, then add bespoke capabilities with custom development.
- Design and deliver entirely new ArcGIS Platform apps, widgets and extensions with Esri development APIs.
